HEDIS[®] COMPLIANCE

CPT[®] Category II Codes

Prepared by The Quality, Strategy and Performance Operations Team: UnitedHealthcare, HPN
 HEDIS is a registered trademark of the National Committee for Quality Assurance (NCQA).

CPT® Category II codes make it easier for you to share data with UnitedHealthcare quickly and efficiently.

When you add them for certain services and test results, we can get a more complete picture of our plan member’s health- and help you close care opportunities tied to Healthcare Effectiveness Data and Information Set (HEDIS®) performance measures.

Using CPT® Category II codes may also offer these benefits:

Fewer medical record requests

When you add CPT® Category II codes, we won’t have to request charts from your office to confirm care that you’ve already completed.

Enhanced performance

With better information, we can work with you to help identify opportunities to improve patient care. This may lead to better performance on HEDIS® measures for your practice.

Improved health outcomes

With more precise data, we can refer UnitedHealthcare plan members to our programs that may be appropriate for their health situation to help support your plan of care.

Less mail for members

With more complete information, we can avoid sending reminders to patients to get screenings they may have already completed.
