

Prenatal and Postpartum Care (PPC)

New for 2026

- No applicable changes for this measure

Yes!
Supplemental data accepted

Definition

Percentage of deliveries of live births on or between Oct. 8 of the year prior to the measurement year and Oct. 7 of the measurement year. The measure includes the following 2 indicators:

- Timeliness of prenatal care – Percentage of women who had a live birth who received a prenatal care visit in the first trimester on or before the enrollment start date or within 42 days of enrollment in a UnitedHealthcare health plan
- Postpartum care – Percentage of women who had a live birth who had a postpartum visit on or between 7–84 days after delivery

Plans(s) affected	Quality program(s) affected	Collection and reporting method

Prenatal and Postpartum Care (PPC) (cont.)

Tips and best practices to help close this care opportunity

- **When submitting a claim for bundled maternity services**, it is important to also submit separate claims for the pregnancy diagnosis office visit and postpartum visit with appropriate CPT® Category II Codes
 - Prenatal care: When submitting claim for initial pregnancy diagnosis visit (e.g., urine test, ultrasound), always include CPT® Category II 0500F as a no charge line item.
 - Postpartum care: When submitting claim for first office postpartum visit, always include CPT(R) Category II 0503F as a no charge line item
 - If your electronic medical record (EMR) system allows macros that auto-populate CPT® Category II Codes when submitting a claim for diagnostic tests (e.g., pregnancy urine test, ultrasound), please **add 0500F (prenatal) when individual E/M codes are used**
- Ultrasound and lab results alone aren't considered a visit. They must be linked to an office visit with an appropriate practitioner to count for this measure.
- A Pap test alone doesn't count as a prenatal care visit, but will count toward postpartum care as a pelvic exam
- A visit with a registered nurse will **not** meet compliance. See acceptable provider types above.
- When the prenatal care visit is with a PCP, the claim must include the prenatal visit, and a diagnosis of pregnancy
- The CDC, American College of Obstetricians and Gynecologists, American College of Nurse Midwives and American Academy of Family Physicians all recommend that pregnant women receive the following immunizations:
 - A flu shot during any trimester of their pregnancy to protect themselves and their newborn babies from flu
 - 1 dose of Tdap every pregnancy, preferably during early part of gestational weeks 27–36
 - Visit [cdc.gov/vaccines/pregnancy](https://www.cdc.gov/vaccines/pregnancy) for patient and provider resources

Payment of covered services is contingent upon coverage within an individual member's benefit plan, your eligibility for payment, any claim processing requirements, and your participation agreement with UnitedHealthcare.

Prenatal and Postpartum Care (PPC) (cont.)

- The American College of Obstetricians and Gynecologists (ACOG) recommends implementation of the following clinical workflows:
 - Screen patients for depression/anxiety at least once during the prenatal and postpartum visit, with additional frequency for higher risk women
 - Use a screening tool validated for use during pregnancy and the postpartum period to measure the level of risk, (i.e., Edinburgh Postnatal Depression Scale (EPDS) or Patient Health Questionnaire 9)
 - Train all care team members on the importance of depression screening and follow-up care
 - Establish a system to ensure follow-up for diagnosis and treatment for positive screenings
- Prenatal and postpartum codes can be accepted as supplemental data, reducing the need for some chart review. Please contact your UnitedHealthcare representative to discuss clinical data exchange opportunities.
- Services provided during a telephone visit or online assessment (e-visit/virtual check-in) will meet the criteria for numerator compliance
- Provide education to members on importance of prenatal and postpartum care for them and their baby
- Identify members with ER visits who have a diagnosis of pregnancy and initiate timely follow-up
- Assess and address potential barriers to receiving care when pregnancy is confirmed
- Provide close monitoring and initiate relevant referrals for members who have had substance abuse or mental health diagnosis
- Ensure available appointments exist to allow for timely scheduling of members during their first trimester or postpartum period
- For members who do not show or schedule appointments, attempt to engage using a telephone or video visit to close the care gap
